

Changing euro range hood bulb

Turn of lights to the light bulb. Make sure the bulb being changed is not hot

HOW TO REPLACE EURO RANGEHOOD BULB

[Euro appliances are popular in Australia.](#) Here is the video to help change that bulb in your euro range hood.

For most people it will be just go in there in that little slits with a flathead screw driver and yank it out. For rangehoods that have not had a build change for a year or two, it might be a little bit harder to yank out, due to it becoming a bit sticky.

The glass is round and just lying against the metal in this one, so as long as you just slide the flat head in the slit and pull down you should be fine to pull it out

Replacing Halogen Light Fixture:

- This range hood uses halogen light fixture: 20W 12V (Product ID: SV168-ACS-HAL20W).
- Make sure the range hood is unplugged or turn OFF breaker and the lights are cool to touch.
- Place a flat-head screwdriver between light housing and hood body, gently pry up the light housing and search for the metal clip.
- Apply force to the metal clip and pull out the light fixture. Disconnect the power cable and discard the old light fixture.
- Reverse the steps to install a new halogen light fixture. Turn ON breaker and range hood to test for operation.

Replacing Halogen Light Bulb:

- This range hood uses halogen light bulb: 20W 12V (Product ID: SV-ACS-HALB20W).
- Make sure the range hood is unplugged or turn OFF breaker and the lights are cool to touch.
- Place a small flat-head screwdriver between light housing and lens cover, carefully and gently pry up the lens cover.
- Remove the old halogen light bulb by pulling in the direction of wavy arrow. Do not touch the new light bulb with bare hands.
- Reverse the steps to install a new halogen light bulb. Turn ON breaker and range hood to test for operation.
